- **NEW** heavy duty industrial strength zipper
- **NEW** durable elastic strap to keep bag rolled up or to carry

KenkoTherm® COCOON

QRF

Quick Reference Flyer

For sleep, warmth or relaxation the KenkoTherm® Cocoon offers Nikken TriPhase Technology and compact convenience. Open it up and you have a queen-size bed comforter, a travel blanket or wrap for outdoor activities. Zip it closed for a snug sleeping bag. The KenkoTherm Cocoon is a portable expression of the unparalleled Kenko sleep experience — only from Nikken.

Magnetic technology that surrounds you

- Sixteen 700-gauss magnets in a spaced configuration
- Designed to replicate the magnetic field in our natural environment
- When used as sleeping bag, completely envelops the sleeper

Far-infrared gentle warming

- Nikken Far-Infrared Technology absorbs natural energy from any source: bodyheat, sunlight, room temperature.
- This energy is reflected only in far-infrared wavelengths
- The result is cosy, mild warmth for all seasons
- Self-regulating temperature control releases excess heat to prevent buildup

Invigorating negative ions

- Nikken Negative-Ion Technology produces charged oxygen ions like those found in the air near waterfalls and in forests
- These ions help you feel revived, recharged and ready to go

Amazing versatility

- Can be used as travel quilt, sleeping bag or wrap
- Folds to a compact size
- Durable, long-wearing microfibre shell and filler
