PiMag® Ultra Shower

Clean, chlorine free showers

- Shower in water naturally cleansed of common irritants
- Removes 100% of chlorine
- Can be beneficial to both skin and hair
- Features a replaceable filter cartridge
- Easy to install with a long, 1.8m hose
- Five-way adjustable spray including massage option

PiMag® water for your skin

Our bodies not only absorb chlorine or other disinfectants through drinking but also through water vapour and through our skin when we shower. When our water is sanitised disinfectants are added and, although quality standards apply, some will make it to our homes, along with disinfection by-products, also affecting both taste and smell. These contaminants are generally considered safe but can still be a source of physical stress on our bodies and can be quite harsh, oxidising, and drying for the skin.

The PiMag® Ultra Shower removes 100% of this chlorine and most other contaminants, helping to avoid common skin irritations, and is likely to result in smoother skin and softer hair.

Cleansing PiMag® water

The shower head is easy to install and features a five-way adjustable spray – from a pure-mist effect, to a deep-cleaning spray to help ease aching, tired muscles. The PiMag® Ultra Shower also features Nikken's exclusive blend of filtration materials and magnetic technology.

Filter replacement

Every 90 days, in order to maintain the optimum benefits.

Care instructions

The handle can be cleaned in warm water with mild detergent once the filter has been removed. The head itself is 'self cleaning'. Just wipe firmly with a cloth on the shower face.

Technology	Field Gradient Magnetic and PiMag® Water Technologies
Weight	840g
Dimensions	L 28cm, handle W 4cm, Shower head diameter 8cm, Hose L 183cm
Magnet strength	1500 Gauss
Materials contained in product	ABS (Acrylonitrile-Butadiene-Styrene), KDF (Kinetic Degradation Fluxion Media), Chlorgon, NBR (Buna Nitrile), SS-304, recyclable plastic
Pressure requirements	25PSI (1.73 bar) – 80PSI (5.5 bar). Maximum flow rate is 9.54 litres per minute. Due to its filter feature, a slight reduction in pressure may be experienced from your normal shower.
